

TERMCO BELL MOUTH LUGS

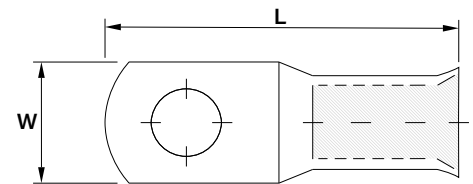

Key Features:

- **Flared Entry**
- **Made to Australian standards AS/NZS4325.1**
- **99.9% Conductivity by I.A.C.S standards**
- **Works with existing Australian tooling**
- **Suitable for connecting copper conductors in both indoor and outdoor applications**
- **Electro Tinned**
- **For Cables: 10mm² - 300mm²**

Termco Copper Bell Mouth Lugs – are made with a flared cable entry (similar looking to a bell) to suit flexible cables, that when de-sheathed, often fray and become difficult to insert into the correct size copper tube. The flared entry allows for ease of insertion of any cable without having to go up a lug size and risking a weaker crimp connection. These are available in 10mm² – 300mm² with other sizes available made to order.

All Termco Copper Lugs and Links are made to the highest possible specifications and are electro tinned finished. Manufactured to Australian dimensions, the Termco Copper Lugs and Links comply with Australian Standards AS/NZS4325.1 and is fully compatible with existing Australian tooling.

Part Number	Cable Size	Stud Size (mm)	Overall Width W (mm)	Overall Length L (mm)	Pack Qty

Engineering Supplies PTY LTD

Our Aim

Engineering Supplies aims to be the first supplier of choice and always exceed its customer's expectations through competitive pricing, quality products and exceptional service. Large stock holdings enable Engineering Supplies to meet customer requirements in a timely manner.

Our Products

Importers of cable ties, cable wraps & glands, electrical insulations, lugs and terminals, switchboard laminates & accessories and act as distributors of quality brands such as KSS, Raychem, Utilux, Dulmison, Critchley and Termco amongst others. Engineering Supplies is also the West Australian distributor for Dry Treat sealers and Semikron power electronic components.
